WEEK NINE STEP BY STEP CHECKLIST.

Please try to complete the following tasks by next week.

This task should take you all week as you generate niche ideas. Please don't rush this part of the program.

Feel free to print this page and check each task as you complete it.

Hi Again,

You have achieved a lot over the last Eight weeks but now it's time to begin to get serious and start creating your very first info product. While this may sound like a daunting task let me assure you that it's not. I am going to take things nice and slow so please don't let this worry you.

There are no videos this week as they are not required. We will start with niche selection. Be sure to take your time choosing your niche because once you choose a niche you will need to put everything into it. So be sure to choose something that you feel passionate about or are at least willing to learn. Just follow the checklist provided and be ready for next week.

You will find the product development and creation stage will last around eight weeks so get ready for eight weeks of serious work. I hope you're looking forward to it as much as I am.

I will be creating an info product of my own just like you so this really will be as step by step as I can make it. Just remember to take each week one step at a time and you will be fine.

Also, remember to keep posting to your blog as you will ultimately use this to promote your product. This is very very important so keep at it.

Until next week... John Thornhill
